INNOVATING FOR GLOBAL HEALTH
UNITAID seeks faster, cheaper and better ways to prevent, test and treat HIV, Tuberculosis and Malaria

HOW WE OPERATE
UNITAID collaborates with global health partners and governments to:

- Identify short-comings in the global response
- Search for smart new ideas to help close the gaps
- Choose the best proposals and fund their development
- Accelerate full-scale deployment of practical solutions

WHAT WE ADDRESS
UNITAID fast tracks introduction of new health solutions by overcoming:

- Intellectual property barriers
- Lack of evidence
- Inadequate delivery
- Substandard quality
- High prices

BREAKTHROUGHS IN FIGHTING DISEASE
UNITAID has actively contributed to:

- Cutting the cost of antiretroviral medicines from $10,000 to $100 for a year’s treatment (99%)
- Introducing new TB testing tools, doubling detection rates for drug-resistant TB (100%)
- Expanding access to new malaria drugs and diagnostics, contributing to 50% reduction in deaths since 2000 (50%)

Main contributors to Unitaid are: France, United Kingdom, Brazil, Norway, Chile, South Korea, Mauritius, Madagascar and Bill and Melinda Gates Foundation
